

PC-3000

PC-3000 HDD Data Recovery Advanced Training

This advanced training course focuses on providing skills and specialized knowledge for recovering data from the wide-spread SEAGATE F3 drives. We also teach our attendees advanced techniques like using ATA Commander and the script system.

The latest research has demonstrated that recovering data from a SEAGATE F3 drive is not easy - it is time consuming, and specific knowledge is required to find an appropriate solution for most difficult cases. That is why deep knowledge of Seagate is a crucial point for successful recovery.

Day 1 Highlights

The first day is devoted to fundamental knowledge and learning about SEAGATE F3 HDD architecture. The disk structure and principles of operations are fully analyzed.

Day 2 and 3 Highlights

Seagate F3 HDD issues are presented, including root cause analysis. Attendees review complicated and tricky cases and learn methods how to solve them using the latest version of the PC-3000. Methods are demonstrated in practice exercises. This day will be also devoted to your questions about real HDD recovery cases.

What you get

- Top-notch skills and insights about Seagate drives
- Deeper knowledge about tips and tricks of Data Extractor
- 1 month of FREE Technical Support for your PC-3000
- Official ACE Lab Data Recovery certification
- Useful handouts!

Only users with sufficient knowledge of the PC-3000 are admitted to this course. Attendees will need to have already completed the Expert HDD course at the ACE Lab Training Centre and/or have significant experience in HDD data recovery. Attendees are welcome to bring their own Seagate HDD which they can't restore.
