

### Bantam Tools Desktop PCB Milling Machine

The Bantam Tools milling machine is a highly precise, compact, and easy-to-use desktop CNC mill for use in chip-off forensics.

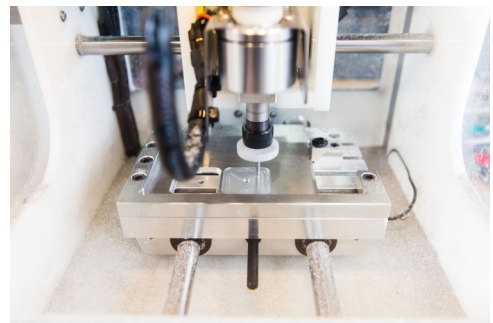

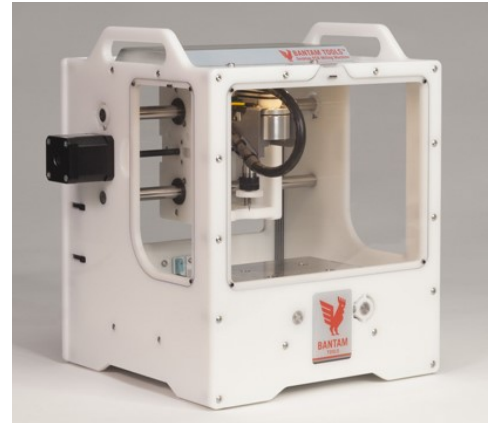

The mill allows chip removal and milling / shaving away PCB and Epoxy to enable reading of memory chips from mobile devices.

#### Complete Kit includes

- Othermill and standard 2 flute carbide 1/32 inch and 2 flute 1/64 endmill
- 4 additional 4 flute flat 1/32 inch carbide endmills
- Compact vacuum
- Precision caliper
- External power brick, power cord, and USB Cord
- Accessory Kit with everything needed to operate your machine. Including wrenches, fixturing screws, an alignment jig, pulley belts, and end mills
- Your very own first milling project, the Bantam Tools. "Hello, World!" Getting Started Kit.
- Instructional videos and support during set-up and use for forensic milling.
