About Disklabs Faraday Bags

Disklabs are a Cyber Forensics company, with a background in Data Recovery and Digital Forensics. In 2004, Disklabs needed to protect a mobile device from connecting to a network and developed the world's first Faraday bag with a window that allowed the forensic analyst to view the screen of the mobile device. Since then, Disklabs have been designing and developing a range of RF Shielded Faraday bag products for all needs. Choosing to work with only the best distributors globally, Disklabs now serve markets which include, among others such as Police Forces, Intelligence Agencies, Military Units, Government Departments,
C-Suite Executives, VIP's, Celebrities and Owners of High Value Vehicles.

Disklabs Faraday Bags will protect your devices from 2G, 3G, 4G, 5G, Bluetooth, GPS and WiFi, (2.5Ghz and 5Ghz).

Protecting Your Digital Life.

Key Shield

Blocks all signals to and from remote key fobs. This prevents a common Relay Theft hack of your vehicle.

Key Shield KS1

10cm x 10cm	N/A	
11.5cm x 11.5cm	N/A	
17cm (Open)	40g	

The KS1 is a windowless bag that can secure key-less car entry fobs or other small devices up to 10cm x 10cm in size.

Key Shield Home KSH

14cm x 24cm	N/A	
17cm x 25cm	N/A	
31cm (Open)	100g	

The KS1H is a stylish bag designed for the home user to store keyless car entry fobs or small devices up to 14cmx24cm. This is also large enough to secure an iPad Mini.

All Disklabs bags can be manufactured with your own logo or your customers logo. Faraday Bags can also be made unbranded. Ask you distributor for more details* (subject to quantity).

ID Shield

Ensure you're not tracked.

Ensure you can't be disturbed in sensitive meetings or conferences.

ID Shield

ID1

11cm x 15cm		N/A	
12.5cm x 17cm		N/A	
22.5cm (Open)		55g	

The ID1 is a windowless bag with a windowed pouch allowing a mobile phone and passport to be secured whilst allowing the ID Card in the pouch to be displayed, so it continues to work with RFID and NFC. It has a soft back and a lanyard which allows it to be worn around the neck.

All Disklabs bags can be manufactured with your own logo or your customers logo. Faraday Bags can also be made unbranded. Ask you distributor for more details* (subject to quantity).

Holdall Shield

Holdall Shield

HS1

60cm x44cm	↓↑	N/A
62.5cm x 48cm	↓↑	N/A
61.5cm (Open)		630g

The HS1 is a large windowless bag, similar in size to a messenger bag. It comes with carry straps and is designed to isolate larger portable computers, or a range of devices, securely. It can carry devices up to 47cmx60cm.

Holdall Shield 3 (40 Ltr)

HS340ltr

48cm x 32cm	↓↑	29cm
50cm x 33cm	↓↑	30cm
55cm (Open)		1150g

The HS3 40ltr is a large holdall-style bag that is designed to isolate and transport a large quantity of electronic devices, or goods where there's a suspicion that tracking devices may have been discreetly installed. It has a zip top and a carrying strap and handles. The 40 ltr capacity holdall has an internal size of 45cmx31cmx28.5cm. This bag is also lockable with evidence tags.

Duffel Shield (65 Ltr)

DS4

60cm x35cm	↓↑	25cm
62cm x 37cm	↓↑	29cm
60cm (Open)		1500g

The DS4 65ltr is a duffel-style holdall that can be used to secure a large quantity of electronics and ensure that contents can't be tracked by any devices that have been hidden within them. It has a roll-down top that secures with clips, a carrying strap and handles. The internal measurements are 60x33x32cm.

Holdall Shield 3 (80 Ltr)

HS380ltr

67cm x 32cm	↓↑	33cm
69cm x 34cm	↓↑	35cm
63cm (Open)		1740g

The HS3 80ltr is an extra-large holdall-style bag that is designed to isolate and transport a large quantity of electronic devices, or goods where there's a suspicion that tracking devices may have been discreetly installed. It has a zip top and a carrying strap and handles. The strapping on this bag can be used to carry as a Ruck Sack, as well as the traditional handle style carry. This bag is also lockable with evidence tags.

Speciality Shields

Drone Shield

DS1

		N/A
125cm x 60cm		N/A
80cm (Open)		3450g

The DS1 is a Drone Shield bag that is designed to ensure captured drones are not accessed remotely to remove evidence on them before they can be examined. It can also carry large electronic devices, without any tracking or remote access. The internal size is 125x60x30cm and the bag features loops for attaching handles and straps.

Faraday Blanket

FB1

N/A		N/A
2m x 2m		N/A
N/A		5.5KG

The Faraday Blanket is designed to limit radio signals. It is commonly used by TEMPEST Teams to restrict the signals during testing. Shields RF signals from mobile phones, tablet devices and laptops. Uses Disklabs 5 layer DL5LFSM material that blocks radio signals. Uses Cordura as external material and is water resistant

Rack Shield (4U)

RS4U

81cm x 29cm		60cm
97cm x 30cm		64cm
130m (Open)		3450g

The RS4U is an unbranded Rack Shield bag that features no external branding to give any indication of purpose or contents. It is designed to carry large electronic devices such as rack-format computer servers up to 4U deep securely and covertly without tracking or remote access. The internal size is 125x60x30cm and the bag features loops for attaching handles and straps.

All Disklabs bags can be manufactured with your own logo or your customers logo. Faraday Bags can also be made unbranded. Ask you distributor for more details* (subject to quantity).
